

Striker Gold

Ryegrass Blend

Premium sports surfaces

Composition

- Premier 3 ryegrass
- Barorlando ryegrass
- Pinnacle III ryegrass

Sowing rate

- 3-5kg/100m²

Suitable for

- Premium sportsfields, especially when oversowing for winter play

An elite blend of ryegrasses containing three of the best continental varieties: Premier 3, Barorlando and Pinnacle III ryegrass. It is a significant improvement over previous commercial varieties of turf-type perennial ryegrass and Mediterranean genetics.

Offering a combination of fast germination, good colour, winter vigour and dense tillering for strong recovery after wear this is an elite sports field blend for the premium surface requirement.

Key features

- Good disease resistance
- Fast germination (5-7 days)
- Fine-leafed, dense with excellent mowability
- Very dark green colour

Key benefits

- Aggressive growth restricts poa annua
- High in endophyte for improved insect and disease resistance
- Good winter hardiness

"I have been using the Barenbrug / Nuturf Striker Gold seed blend for 5 seasons and it continues to prove itself a perfect blend for my field. Striker Gold is a resilient blend handling the wear from the hectic training and gameday schedules very well whilst maintaining a high-quality presentation with its uniform colour and is frost hardiness which is important in our challenging winter climate. Feedback from the Albury Tigers players is they love to train and play on the surface which further validates our choice and confidence in this seed. We also value the independent trials Barenbrug puts its rye grasses through as it gives us great confidence when selecting and purchasing seed each year."
